

FAMA VIP AI Prompt: Compare Meta Ads Performance Between Two Periods and Provide Strategic Analysis

Prompt to paste into ChatGPT:

****Upload a screenshot of the filled out [Trends & Analysis Sheet](#) and then copy and paste the prompts below.**

I want you to act as a **Meta Ads performance strategist**. I'm sharing data from two different reporting periods for one of my ad accounts. Please analyze it using the **F.A.S.T. Framework**, then compare the two periods side-by-side to uncover what changed and why ROAS went up or down.

What to include in your response:

1. **Overall Insight** – What is the story behind the performance shift?
 2. **What's Working** – Which parts of the funnel are stable or improving?
 3. **What's Not Working** – What deteriorated and might be causing the drop in ROAS?
 4. **Strategic Recommendations** – What specific next steps should I take (e.g., test new hooks, pause underperformers, tweak offers)?
 5. **Client Summary (Plain Language)** – One short paragraph that I can send to the client, highlighting what happened and what we'll do next, without overwhelming them with metrics
-

Data I'm providing:

- **Date Range 1 (Previous Period):** [Insert start & end dates]
- **Date Range 2 (Current Period):** [Insert start & end dates]
- **Optimization Goal:** [e.g., Purchases]

- **Key Metrics Provided:**

- Spend
- Impressions
- Link Clicks
- Adds to Cart
- Purchases
- Revenue
- CPM, CTR, CPC
- Bounce Rate
- ATC %, CVR, CPA, AOV
- ROAS

Calculate impact when necessary. My goal is to identify what to fix or scale next.

Client Summary (Non-Technical)

Create a short, simple paragraph that I can send directly to the client. It should summarize key insights in **plain language**, avoid overwhelming metrics, and highlight the **next step** or **strategic direction** we're taking. Tone should be calm, confident, and clear.
