

RESEARCH AUDIT

Four checks, one page each

AI did the research. Your name is on it.

Attach the AI research pack as evidence you ran the prompt. This worksheet is the part that gets graded, because this is the part that is yours.

Four checks. Nothing else. If you finish this and have not changed a single thing the AI gave you, go back and look harder.

THE FOUR VERDICTS

ACCEPT

It is traceable and I agree.

EDIT

I changed it, and I said how.

REJECT

Not supported, I removed it.

FLAG

Might be true, cannot be shown yet.

BEFORE YOU RUN

Fill this in first. The second half is worthless if written afterwards.

BRAND	MARKET	DEPTH	TOOL USED
		GOOD / BETTER / BEST	

What I expect the main objection to be

What I expect the main desire to be

DATA HYGIENE

☐

I removed names, emails, numbers and order IDs from anything I uploaded.

☐

I am allowed to use this client data, or I uploaded none.

SOURCES

Open Section 1 of the pack. Do not take the checkmarks at face value.

Which sources did the AI say it checked but clearly did not, or could not?

Who is overrepresented in this evidence? Complainers, fans, or one platform?

One question this evidence CANNOT answer, no matter how good it looks

VERDICT

- ☐ Good enough to work with.
- ☐ Sent it back. What I asked for:

PATTERNS

Open Section 4. The AI proposes groupings. You decide whether they hold.

AI PATTERN	PEOPLE	SITES	YOUR VERDICT

If the AI gave you quote counts instead of people counts, that alone is an EDIT.

One change I made: merged, split, renamed or rejected. Which, and why. **REQUIRED**

One piece of evidence I found that DISAGREES with the AI main finding

CAN YOU TRACE IT?

Pick three claims at random from anywhere in the pack, including the executive summary. Do not pick the easy ones. For each, find the actual words behind it.

THE CLAIM	THE EXACT WORDS BEHIND IT	SOURCE / URL	VERDICT

How many of the three could NOT be traced to a real source?

What did you do about them?

REMEMBER

Untraceable does not mean untrue. It means you cannot say it yet. That is a FLAG, not a fact.

JUDGMENT

Open Sections 6, 10 and 11. This is where you stop checking and start deciding.

THE MARKET

The desire, in your words: what they want to KEEP

The desire, in your words: what they want to LOSE

AI SOPHISTICATION STAGE	DO YOU AGREE?	WHY, OR WHY NOT

ONE WHITE SPACE

THE IDEA	DO CUSTOMERS WANT IT?	IS ANYONE SAYING IT?	CAN THE BRAND BACK IT?	TIER

WHAT YOU STILL DO NOT KNOW

WHAT WE DO NOT KNOW	WHAT TO COLLECT NEXT	WHERE TO GET IT

SIGN OFF

How many things did you EDIT or REJECT in total?

Look back at page 1. What did you expect, and what actually turned up?

- ☐ Every claim I kept can be traced to a source I can point to.
- ☐ I counted people, not quotes.
- ☐ There is counter-evidence in here.
- ☐ Every inference is labelled as an inference, not stated as fact.
- ☐ I did not call any ad a winner.

NAME AND DATE _____

WHAT TO SUBMIT

INDIVIDUAL

The AI research pack, this worksheet, and your top three insights.

POD

Five slides, one minute each. What surprised you. Top three patterns. Strongest buyer insight. What the category keeps saying. Your strongest evidence chain.

Graded on what you changed and whether you can trace it. Not on length. A beautiful AI pack with an empty worksheet scores near zero.

RED FLAGS

Keep this. It works on any AI output, not just research.

Round numbers. Thirty percent, one in three. Real evidence is rarely tidy.

Demographics with no quote behind them. Age, city and hobbies nobody mentioned.

A statistic with no URL. Then there is no statistic.

Customer language that matches the brand copy. You may be reading the ad back.

Any claim that an ad is winning. Nobody outside the ad account knows that.

An inference with no gap attached. A conclusion travelling without its caveat.
